70M chain
Electric anchor winch
Batteries 4 x 100Ahr
Solar 4 x 100Watt
Solar controller
1000Watt inverter and 200Watt inverter

Registered: Australia

This yacht has completed one and a half circumnavigations of the globe since new and has been in the Philippines for a few years. Cabin has one double berth, a single berth with drop down table, plus V-berth at the bow. The galley has a twin-burner LPG cook-top and for washing there is salt water (foot pump) and fresh water (electric pump). LPG bottle in aft of cockpit. Cockpit and lazarettes are made of 316 stainless steel.

The boat is for sale as a project boat because there are a few things that need to be done before crossing an ocean again. Important stuff: engine is OK, just needs injector cleaning; hull is in very good condition; top-sides need a lot of TLC, e.g. quite a bit of rust in rails etc.

Moored in dry dock area Danao, Cebu. Have lived aboard for the past 5 years in Danao where there are a great bunch of international sailors who are all very knowledgeable in all aspects of boats. A great place to get work done expertly at possibly the lowest prices anywhere. Brilliant craftsmen on site including expert welders, carpenters and diesel mechanics

My To-Do List:

- Decks need filler and painting
- Railings have some rust issues but tradesmen here can handle easily
- Engine needs a good service and the injectors need a clean and reset
- Wiring needs to be re-worked for electric fuel pumps through two filters
- Rigging needs a tune after refitting the forestay

Reason for sale: Very reluctant to sell but age has caught up with me after 75 years and I have an overactive 3.5 year old who does not know the meaning of the word danger.

Quite a lot of spares with the boat including essentials such as:

- Raw water impellers
- Spare bilge pump

- Flares dated

VHF radio included with masthead antenna
