Cruising Yacht For Sale

Following is a list of upgrades as of February, 2021. First was the above-mentioned engine change, about 2002. Later I added a Watermaker, an Icom Singlesideband with Antenna Tuner, and A new V.H.F. A Weather Fax, all new Cockpit Instruments, a Radar Detector, and A 220Vac Inverter of about 5KV. A Solid Bronze Anchor Windless.

Sails: I had a new Mainsail made in H.K. Cheong Lee. About 2009. A new 150 Genoa made about 2011. Total Sails aboard now: 3 Mainsails, 2Genoas, 2 Jibs,1 Stormsail, and Jib. 1 Spinnaker, All set up for the Harken R.F. System, pus Wind Generator and Solar Panel. As at February, 2021, all were working. However, the Cockpit Instruments may be an issue as they are all LCDs and they fade in the intense heat there. If they are unusable I will discount them as appropriate.

The Autohelm was aboard when I bought the Vessel. It has been very reliable, I have replaced one of the Signal Cables over the years. I have owned and repaired many Autopilots on many Boats over the years, this is the best one by far.

Things to do:

- the Life raft will need repacking.
- the batteries will probably need replacement, 2x100 AH units.
