

**Custom Stylish Catamaran 34-foot Philippines** - registred commercial ready for business

Build in 2018, this 34 ' by 20' Catamran as a unique style, with lots of space for is size, it as one master bedroom in the main cabin for nice living onboard experience ( like a loft with a sea breeze and view) It as space for 3 rooms twin beds inside the hulls and a spaciou WC area. Solid roof top and a big net in the front. There is great solar system, lots of energy with 2 Lithium LIFEpo4 batteries 24v - 200ah with a hydrid 3000w inverter converter and 2 big solar panels 550 watts total. The boat is powered with a central mounted 70hp Yamaha remote controlled, Garmin sonar, anchor and ropes, fenders, lines and pulley comes with the boat. All made with Mahogany, fiber glass and epoxy ( axiom )and has double flooring section as well.

The boat is Registred in the Philippines for Commercial Use, meaning you can start your business right away with no problem. The boat was used as a house first, then a Luxury room for rent and also a diving boat supporting 15 peoples at least for parties or diners. The Boat needs some easy finishing touches ( some painting inside de hulls, varnish wood, minor repairs, and it's really easy to adapt and modify to your convinience. We used the Boat as a power boat but it was on the way to be a Sailboat catamaran ... The Wooden Mast is done and rigged but as to be mounted on top of the roof and pull up the sail. A main sail comes also with it. If you feel like having a sailboat its designed and calculated to be one, you just need to finish it, but the main stuff is done.

Don't hesitated for any question, i will be happy to answer by email:
